

If you are using the regular 32-bit version of Windows 7, Vista or XP, TSP 5.0 / GiveWin should run fine.

If you have the 64-bit version of Windows 7, Vista or XP, then the TSP installers will not run, but you can work around this by installing TSP on a 32-bit Windows system, then copying the uncompressed files to the 64-bit system (using the network or a USB Flash drive, etc.), and then give 2 commands to complete the installation.
